# Metaheuristics for Optimization

## EVALUATION METHOD

2022

---

### Final exam

The theoretical part of the course will be evaluated during the final oral examination, but you can also expect short questions on any TP. You can get up to 5 out of 6 points.

To have access to the oral exam you need to pass 60% of the in-class graded TP sessions.

There are going to be 14 TP sessions (look at the table below for more detailed scheduling), 10 of them are going to be graded in class.

The remaining are going to be dedicated to TP3 and TP7, for the both of which you are going to produce and submit one report each. These two reports are going to be graded and will award you a max of 1 point total, to add to your oral evaluation.

If you cannot meet the requirements to have access to the oral examination you will have to retake the course next year.

### On the day of the exam

A randomly drawn question is assigned to the student. The student has 20 minutes to prepare the answer, writing notes with a pen on a white sheet. The use of any material other than pen and paper is not permitted. After the preparation phase, the student has 20 minutes of oral presentation time in front of the professor and assistants.

### Schedule

19 September	TP0	in-class evaluation
26 September	TP1	in-class evaluation
3 October	TP2 pt.1	in-class evaluation
10 October	TP2 pt.2	in-class evaluation
17 October	TP3 pt.1	report
24 October	TP3 pt.2	report
31 October	TP4 pt.1	in-class evaluation
7 November	TP4 pt.2	in-class evaluation
14 November	TP5 pt.1	in-class evaluation
21 November	TP5 pt.2	in-class evaluation
28 November	TP6 pt.1	in-class evaluation
5 December	TP6 pt.2	in-class evaluation
12 December	TP7 pt.1	report
19 December	TP7 pt.2	report
